Counting grouped collections

6 practice questions

1. Four pairs of shoes contain how many shoes?

Count $2, 4, 6, 8$.

Answer: 8 shoes.

2. Three bags each hold five counters. Find the total.

Count $5, 10, 15$.

Answer: 15 counters.

3. Two boxes each hold ten crayons. Find the total.

Count $10, 20$.

Answer: 20 crayons.

4. Four plates each have three grapes. How many grapes?

Count the grapes in each plate: $3, 6, 9, 12$, or count all twelve.

Answer: 12 grapes.

5. Lily counts four groups of two as $2, 4, 6$. What is missing?

She must say one total for each of the four groups.

Answer: The fourth count, 8.

6. Three trays each hold four cups. Draw the groups and label the total.

4 and 4 make 8; another 4 makes 12.

Answer: 12 cups.
