Finding missing numbers

6 practice questions

1. Complete: $7 + \square = 12$.

$12 - 7 = 5$.

Answer: 5

2. Complete: $\square + 9 = 16$.

$16 - 9 = 7$.

Answer: 7

3. Complete: $18 - \square = 10$.

$10 + 8 = 18$.

Answer: 8

4. Complete: $\square - 5 = 22$.

$22 + 5 = 27$.

Answer: 27

5. Complete: $34 + \square = 40$.

Count on 6 from 34 to 40.

Answer: 6

6. Maya chooses 13 for $\square + 8 = 21$. Show a check.

Substitute the chosen number into the original equation.

Answer: $13 + 8 = 21$, so 13 works.
