Sharing/grouping

6 practice questions

1. Share 6 grapes equally between 2 children.

$3 + 3 = 6$.

Answer: 3 grapes each.

2. Share 12 counters equally among 3 plates.

$4 + 4 + 4 = 12$.

Answer: 4 counters on each plate.

3. Pack 10 buttons in pairs. How many pairs?

Count $2, 4, 6, 8, 10$.

Answer: 5 pairs.

4. Make groups of 4 from 16 blocks. How many groups?

$4 + 4 + 4 + 4 = 16$.

Answer: 4 groups.

5. Share 9 strawberries equally among 3 friends.

$3 + 3 + 3 = 9$.

Answer: 3 strawberries each.

6. There are 12 pencils. Story A shares them among 4 children. Story B puts 4 pencils in each cup. Give both answers with units.

Both use groups of 4 and 3, but the question asks for a different kind of amount.

Answer: A: 3 pencils each. B: 3 cups.
