Analogue/digital clocks to the minute

6 practice questions

1. Read this clock.

The long hand is at 2: 10 minutes.

The short hand has passed 4.

Answer: 4:10

2. Read this clock.

Three marks after 4 means $20 + 3 = 23$ minutes.

The short hand has passed 7.

Answer: 7:23

3. Write thirty-six minutes past ten digitally.

The hour is 10 and the minutes are 36.

Answer: 10:36

4. Write 5:04 in words.

04 means four minutes.

Answer: Four minutes past five.

5. The long hand is on 9. How many minutes past the hour does it show?

9 groups of 5 minutes make 45 minutes.

Answer: 45 minutes

6. At 11:58 the short hand is near 12. Why is the time not 12:58?

The hour changes when the minutes reach 00.

Answer: It has not reached 12 yet; it is still in the eleventh hour.
